

Are you ready to shift into a higher gear and become a superior leader?

There are certain competencies that enable the best leaders to succeed where others fail. The key to leadership isn't that all leaders display these competencies the same way; the key is gaining the awareness of personal strengths and weaknesses that enable the best leaders to utilize these competencies in the most effective way for them.

This course begins with an in-depth analysis of your strengths and weaknesses with respect to 12 critical leadership competencies. You'll then learn how to leverage your strengths and keep your weaknesses from holding you back as you learn specific strategies to develop each one.

DO YOU NEED TO:

- ❖ Align your team with goals, set clear expectations and motivate them to execute?
- ❖ Channel your team's strength to solve problems quickly and effectively?
- ❖ Lead your team through continuous change?
- ❖ Navigate complex organizational dynamics and build key relationships?
- ❖ Get beyond excuses & blame and instill a high standard of team accountability?
- ❖ Prepare for your next leadership role so you can hit the ground running?

“ This is the only leadership course that is so good I would want to take again. This course gives several good tips and provides insights that are specific to the participant. Other courses give you one or two good tips (rarely specific to your style) but fail to inspire bigger change..
